

LIST OF VEHICLES ADMISSIBLE FROM THE UNITED STATES

VERY IMPORTANT VERY IMPORTANT VERY IMPORTANT

TRANSPORT CANADA OR THE REGISTRAR OF IMPORTED VEHICLES CANNOT GUARANTEE THE ACCURACY OF THE INFORMATION CONTAINED IN THIS LIST. THE INFORMATION IS SUBJECT TO CHANGE WITHOUT NOTICE.

THIS LIST IS BASED ON INFORMATION SUPPLIED TO TRANSPORT CANADA AND THE REGISTRAR OF IMPORTED VEHICLES BY THE VEHICLE MANUFACTURERS ON A VOLUNTARY BASIS. ITS ACCURACY CANNOT BE GUARANTEED. THERE IS ALSO NO GUARANTEE THAT ANY VEHICLE DEEMED ADMISSIBLE CAN BE SUCCESSFULLY MODIFIED TO MEET CANADIAN REQUIREMENTS. PLEASE CONTACT THE REGISTRAR OF IMPORTED VEHICLES (WWW.RIV.CA) TO OBTAIN DETAILED INFORMATION ON THE PROCESS THAT MUST BE FOLLOWED FOR THE IMPORTATION OF VEHICLES PURCHASED AT THE RETAIL LEVEL IN THE UNITED STATES.

YOU MAY ALSO ACCESS THE LIST OF VEHICLES ADMISSIBLE FROM THE UNITED STATES ON THE INTERNET AT www.tc.gc.ca/roadsafety

WARNING: Some manufacturers have already started to offer for sale their 2009 vehicle models. Transport Canada has not yet received information regarding the admissibility into Canada of the 2009 vehicle models. If you plan to purchase and import a 2009 model, please contact the manufacturer directly to verify the vehicle's admissibility.

EXPLANATIONS

Please read these explanations carefully before buying a vehicle in the United States

1. A US specification vehicle is a vehicle designed, manufactured and certified by the original manufacturer to meet all applicable US Federal Motor Vehicle Safety Standards. Where a US specification vehicle is listed as ADMISSIBLE, and requires modifications, it may not necessarily be easily modified. You should determine the cost and extent of any required modifications before importing the vehicle into Canada. Vehicles which cannot be modified, for whatever reason, must not remain in Canada and would normally be exported. Where there is no information in this list concerning a US specification vehicle you must contact the manufacturer to determine its admissibility or inadmissibility. Manufacturers of U.S. vehicles are not legally obligated to respond to Transport Canada's requests for information on admissibility status. For those vehicles they deem not admissible, they are not legally required to explain the reasons for inadmissibility but some do. Transport Canada is not legally responsible for the accuracy and safety implications or cost implications of the information provided by the manufacturers (OEMs).

2. All admissible vehicles, except competition snowmobiles, snowmobile cutters and ATVs, must be certified by the original manufacturer as meeting all applicable US Federal Motor Vehicle Safety Standards. In addition, vehicles listed in Sections 4 & 10 and some vehicles listed in Section 5, must also be certified by the final stage manufacturer as meeting all applicable US Federal Motor Vehicle Safety Standards.

Two criteria can be used to determine this: a) A compliance label affixed to the vehicle at the time of main assembly, assembly. One of the following statements must appear on the compliance label:

This vehicle conforms to the applicable federal motor vehicle safety, bumper and theft prevention standards in effect on the date of manufacture shown above, or

This vehicle conforms to all applicable U.S. federal motor vehicle safety standards in effect on the date of manufacture shown above, or b) a letter from the original manufacturer and the final stage manufacturer (if applicable) containing the same information as would appear on the compliance label.

3. Vehicles that have been modified from their original state, other than regular maintenance, may not be eligible for importation into Canada. For example, a van transformed into a motor home (often known as class B motor home), a van equipped with raised roof and/or modified interior, a pick-up or a passenger car equipped with lift kit, etc.

4. Some vehicles in Section 3 - **Passenger Cars**, in Section 5 - **Multipurpose Passenger Vehicles** and in Section 12 - **Trucks** are marked with either: (1) an arrow (>), or (2) ([EIS]), or (3) (>[EIS]).

(1) The arrow (>) indicates that the vehicle will require modification to accommodate the child tether anchorage. Again the modifications may prove to be extensive and expensive.

(2) The letters [EIS] indicate that the vehicle is either equipped with an electronic immobilizer installed by the manufacturer but not certified to meet Canada Motor Vehicle Safety Standard 114 or that no electronic immobilizer is installed. **Please see section 9 of these explanations for further information on immobilizers.**

(3) (>[EIS]) indicates that the vehicle requires modification to the child tether anchorage and that some action is required on the immobilizer (see section 9 for details). Where the the arrow (>) and the letters ([EIS]) are at the end of a group which lists models joined by a comma (,) or an and (&) sign, all models in that group are affected by the arrow (>) and the letters ([EIS]) .

5. US vehicles which were originally equipped with air bags as required by US safety standards must have operational air bags at the time of inspection by the Registrar of Imported Vehicles.

E & O. E.

5. US vehicles which were originally equipped with air bags as required by US safety standards must have operational air bags at the time of inspection by the Registrar of Imported Vehicles.

6. All admissible vehicles, including all types of trailers, must bear a 17 digit alphanumeric Vehicle Identification Number (VIN) as required by Canada Motor Vehicle Safety Standard (CMVSS) 115, including snowmobiles manufactured after January 1, 2001 and restricted use motorcycles manufactured after December 1, 2004. Restricted-use motorcycles manufactured before December 2004 must have a VIN composed of between 14 and 17 alphanumeric digits as required by CMVSS 115.

7. ACTIVE versus PASSIVE RESTRAINT SYSTEMS: Passive restraint systems are identified as a motorized upper torso restraint or a door mounted 3-point restraint. The fact that a seat belt restraint system is considered to be active or passive does not in itself determine that vehicle's admissibility or inadmissibility into Canada. What does determine its admissibility or inadmissibility is whether or not that vehicle meets Canada Motor Vehicle Safety Standard 210 (seat belt anchorage location). Vehicles identified by their manufacturer as not meeting Canada Motor Vehicle Safety Standard 210 at the time of manufacture are not eligible for importation into Canada under any circumstances. No modifications are allowed to the seat belt anchorage system.

8. CONFIRMATION OF NO OUTSTANDING RECALLS: Confirmation that there are no outstanding recalls on a vehicle is a mandatory requirement of the RIV program. This confirmation has to be sent to the RIV as soon as possible before, during or after the importation of a U.S. specification vehicle into Canada. The Inspection Form (Form 2) will only be sent to the importer by the RIV upon receipt and acceptance of the confirmation of no outstanding recalls. To verify what types of confirmation of no outstanding recalls are accepted by the RIV, please visit their Web site at the following address: http://www.riv.ca/english/html/recall_clearance.html. Please send your confirmation of no outstanding recalls to the RIV either by e-mail: recall@riv.ca, or by fax at 1-888-642-9899, or by mail at 405 The West Mall, Toronto ON M9C 5K7.

The symbol (#) indicates that the manufacturer will not issue a confirmation of no outstanding recalls for vehicles that were once declared "salvage" in the U.S. Failure to produce this confirmation will result in a failed inspection; therefore rendering the vehicle inadmissible. Please contact your manufacturer in all cases to ensure that this confirmation can be issued.

9. IMMOBILIZERS

Every passenger vehicle, multipurpose passenger vehicle, truck and 3 wheeled vehicle manufactured after September 1, 2007 and with a Gross Vehicle Weight Rating (GVWR) less than 4,536 kg (10,000 lbs), except an emergency vehicle or a walk-in van, must be equipped with an immobilization system as per the requirements of CMVSS 114.

Electronic immobilizers typically require a special key or small electronic device to start a vehicle's engine. This type of system, when activated, prevents the operation of the engine in response to any attempt to start the vehicle without using the authorized key, by shutting off one or more parts of the engine's electrical system. This might include the starter, ignition or fuel system.

Many manufacturers equip some or all of their US market vehicles with an electronic immobilization system that meets the requirements of Canada Motor Vehicle Safety Standard 114 (CMVSS 114). In some cases, these electronic immobilization systems are available only as an option. There are also several US market vehicles that are either not equipped with an electronic immobilization system or that are equipped with an electronic immobilization system that does not meet the requirements of CMVSS 114.

There are therefore three possibilities depending on the type of immobilizer:

1 .Electronic Immobilizers Installed as Original Equipment and Certified to CMVSS 114

Vehicles equipped with such systems do not require any special inspection or modifications. They are listed as admissible without any special annotation regarding the immobilizer.

2 . Electronic Immobilizers Installed as Original Equipment but Not Certified to CMVSS 114

Vehicles that do not comply with CMVSS 114 will require confirmation of the presence of an electronic immobilizer at the time of the RIV inspection. They are listed as admissible with a special annotation [EIS] regarding the immobilizer. Demonstration of the presence of an electronic immobilizer can be done through one of the following means:

- Presentation of the completed vehicle purchase agreement showing the vehicle identification number and indicating the presence of an electronic immobilizer
- Presentation of the vehicle window sticker (Monroney label) showing the vehicle identification number and indicating the presence of an electronic immobilizer
- A letter from the manufacturer showing the vehicle identification number and indicating the presence of an electronic immobilizer.
- Other type of information present on the vehicle or on the ignition key or fob allowing the positive identification of such a system.

3 . No Immobilizer on the Vehicle

These vehicles will need to be fitted with an immobilization system that conforms to National Standard of Canada ~~CAN/ULC-S338-98, entitled Automobile Theft Deterrent Equipment and Systems: Electronic Immobilization (May 1998), published by the Underwriters' Laboratories of Canada, before being presented for registration under the laws of a province. They are listed as admissible with a special annotation [EIS] regarding the immobilizer. CAN/ULC-S338-98,~~

REVISED ~~2008/10/01~~
~~2008/10/21~~ SUBJECT TO REVISION WITHOUT
NOTIFICATION

E & O. E.

entitled Automobile Theft Deterrent Equipment and Systems: Electronic Immobilization (May 1998), published by the Underwriters' Laboratories of Canada, before being presented for registration under the laws of a province. They are listed as admissible with a special annotation [EIS] regarding the immobilizer.

At the time of the required Federal inspection at one of the RIV inspection stations, the importer must present the original invoice (and provide a copy to the RIV) confirming the installation of an electronic immobilization system compliant with CAN/ULC-S338-98 as mentioned above, on the vehicle. The invoice must clearly indicate the name and address of the after-market installer, the date of installation, the conformity of the system to CAN/ULC-S338-98 and the Vehicle Identification Number (VIN).

Importers should be aware of the following points **before** purchasing a vehicle in the United States:

- There is no guarantee that an aftermarket immobilizer system can be fitted to the vehicle,
- Some manufacturers have indicated that the installation of an aftermarket immobilizer system may affect the vehicle warranty, - Some manufacturers have indicated that the installation of an aftermarket immobilizer system may affect the performance of certain safety equipment on the vehicle,
- Certified installers of CAN/ULC-S338-98 aftermarket immobilizer systems may not be available in your local area.
- The modifications may be expensive

Transport Canada does not endorse any brand of electronic immobilizer systems or installers. More information on immobilizers and installers can be obtained by contacting the Vehicle Security Installation Bureau (VSIB) (<http://www.vsib.ca/index.html>) or the Insurance Bureau of Canada (<http://ibc.ca/>). Other organizations may also be able to supply information.

10. **Warning: Trailers with a GVWR of 4,536 kg or more manufactured after September 1, 2007**

Every trailer with a GVWR of 4,536 kg or more manufactured after September 1, 2007, must be equipped with a rear impact guard that conforms to Section (3) of CMVSS 223 - Rear Impact Guard.

The only exceptions are:

- (a) a pole trailer, a pulpwood trailer, a wheels back trailer or a trailer designed to be used as temporary living quarters; (b) a low-chassis trailer; and
- (c) a trailer designed to interact with, or having, work-performing equipment located in or moving through the area that would be occupied by a horizontal member that meets the configuration requirements specified in the standard.

Most trailers with a GVWR of 4,536 kg or more sold at the retail level in the U.S. and manufactured after September 1, 2007 may not be equipped with a rear impact guard that conforms to Canadian requirements. Before importing a trailer, please verify its admissibility in section 11 of this document.

	FURTHER INFORMATION	
	SECTION 1 - THE REGISTRAR OF IMPORTED VEHICLES	6

On April 12, 1995, a new Motor Vehicle Safety Act and revised Motor Vehicle Safety Regulations were proclaimed. The new Act allows vehicles originally manufactured in compliance with US laws for the United States market to be imported into Canada **provided they comply at the time of main assembly with mandatory Canadian Motor Vehicle Safety Standards (CMVSS) such as CMVSS 210 (seat belt anchorage)**. The new legislation makes it possible for the vehicle to be modified in certain areas (**bumpers, child restraint tether anchorages, daytime running lights and some labeling requirements**). To carry out the task of monitoring the importation of vehicles from the United States, purchased at the retail level, Transport Canada has contracted a company called the **Registrar of Imported Vehicles** to establish and operate a system of inspection and compliance confirmation of imported vehicles. The program is a tightly controlled process of Federal registration, inspection and verification that a US specification vehicle is confirmed compliant to all Canadian Federal safety standards prior to Provincial/Territorial licensing and registration of that vehicle in Canada.

Some of the benefits of this program to Canadians are:

- ** it helps ensure the safety of vehicles on Canadian roads,
- ** it allows vehicles which do not meet Canadian safety standards in such areas as bumpers, day time running lights, child restraint tether anchorages and some labeling requirements to be modified after they enter Canada,
- ** it assists importers through a support system including a bilingual public response service (1-888-848-8240) **
- it assists the Government of Canada by developing and maintaining an accurate and comprehensive data base on such importations, ** it assists Transport Canada in its enforcement efforts, ** it assists the provinces and territories by enabling checks of vehicles prior to licensing and registration in Canada to ensure compliance with Canadian safety standards.

Upon arrival at the border you will require the vehicle's title, documents related to its purchase and a valid driver's license or passport. There must be evidence - Compliance label or manufacturer's letter - that the vehicle was built to comply, and complied, to U.S. Federal Motor Vehicle Safety Standards at the time of main assembly. You must have some means of paying the Registrar's fees, customs charges and taxes - Visa, MasterCard, AMEX, a certified cheque or money order are all acceptable. A confirmation that there are no outstanding recalls on the vehicle or proof that the recall work has already been completed in the U.S. has to be sent to the RIV as soon as possible before, during or after importation. To verify what types of confirmation of no outstanding recalls are accepted by the RIV, please visit their Web site at the following address: http://www.riv.ca/english/html/recall_clearance.html. You can send your confirmation of no outstanding recalls to the RIV either by e-mail: recall@riv.ca, or by fax at 1-888-642-9899, or by mail at 405 The West Mall, Toronto ON M9C 5K7.

The Registrar's fee is \$195.00 Cdn (plus GST) at Designated Ports and at Non-Designated Ports, in all provinces except Quebec, where the fee is \$195.00 Cdn (plus GST and QST). A list of Designated Ports follows this section. The importer is responsible for the actual costs of modifying the vehicle. There are also fees and charges resulting from failure to pass the initial inspection within 45 days.

SECTION 10 - AMBULANCE VEHICLES (Cont'd)

~~NOTE: ALL OTHER AMBULANCE MANUFACTURERS NOT SHOWN ON THIS LIST ARE INADMISSIBLE.~~

SECTION 11 - ALL TRAILERS (see exceptions) WITH A GVWR OF 4 536 KG. OR MORE, MANUFACTURED AFTER SEPTEMBER 1ST, 2007, MUST BE EQUIPPED WITH A REAR IMPACT GUARD (RIG) THAT CONFORMS TO SECTION (3) OF CMVSS 223 - REAR IMPACT GUARD. See explanations section, paragraph #10.

THE EXCEPTIONS ARE:

- (a) a pole trailer, a pulpwood trailer, a wheels back trailer or a trailer designed to be used as temporary living quarters (i.e. travel / RV trailer);
- (b) a low-chassis trailer (i.e. horse / stock trailer, boat trailer); and
- (c) a trailer designed to interact with, or having, work-performing equipment located in or moving through the area that would be occupied by a horizontal member that meets the configuration requirements specified in the standard.

Most trailers with a GVWR of 4,536 kg. or more sold at the retail level in the U.S. and manufactured after September 1, 2007 may not be equipped with a rear impact guard that conforms to Canadian requirements. The following is a list of manufacturers who have demonstrated compliance to CMVSS 223, Rear Impact Guard.

SECTION 12 - TRUCKS WITH GVWR LESS THAN 4536 KG, MANUFACTURED AFTER SEPTEMBER 1ST, 2007 (Cont'd)

MANUFACTURER	ADMISSIBLE	INADMISSIBLE	NOTES
--------------	------------	--------------	-------

^^^^^^ Change Summary. 84 changes found ^^^^^^

<<<2>>> 3 changes at paragraph (15)

Two criteria can be used to determine this: a) A compliance label affixed to the vehicle at the time of main assembly, assembly. One of the following statements must appear on the compliance label: This vehicle conforms to the applicable federal motor vehicle safety, bumper and theft prevention standards in effect on the date of manufacture shown above, or This vehicle conforms to all applicable U.S. federal motor vehicle safety standards in effect on the date of manufacture shown above. -or b) a letter from the original manufacturer and the final stage manufacturer (if applicable) containing the same information as would appear on the compliance label.

<<<3>>> 2 changes at paragraph (21)

5. US vehicles which were originally equipped with air bags as required by US safety standards must have operational air bags at the time of inspection by the Registrar of Imported Vehicles.

REVISED ~~2008/10/01~~ 2008/10/21 - SUBJECT TO REVISION WITHOUT NOTIFICATION

<<<5>>> 2 changes at paragraph (42)

These vehicles will need to be fitted with an immobilization system that conforms to National Standard of Canada ~~CAN/ULC-S338-98, entitled Automobile Theft Deterrent Equipment and Systems: Electronic Immobilization (May 1998), published by the Underwriters' Laboratories of Canada, before being presented for registration under the laws of a province. They are listed as admissible with a special annotation [EIS] regarding the immobilizer. CAN/ULC-S338-98.~~
